

Comprehensive Catalog of 1,500 Project BLUE BOOK UFO Unknowns: Work in Progress (Version 1.1, Nov. 26, 2001)

Compiled by Brad Sparks, © 2001

The main purpose of this catalog *at present* is to help identify and fill in where possible missing or difficult to obtain U.S. Air Force documentation on better quality Unexplained UFO cases, not to present *here* the "proof" of UFO reality nor to discuss possible IFO identifications, subjects reserved for later analysis once full files can be examined. Here the goal is preliminary and to compile more complete documentation, not the perfection of the analysis or categorizations. This catalog will be used eventually to produce *another* catalog of UFO Best Evidence after a screening process based on Hynek's and other criteria and for that reason columns for data on Duration, No. of Witnesses, Angular Size and "Instrumentation/Scientists etc." have been separately presented from the available case data and/or calculated where possible.

When Project Blue Book (BB) closed down on Jan. 30, 1970 (it was not on Dec. 17, 1969, which was merely the announcement date by the Secretary of the Air Force) the total number of Unidentified sightings was thought to be 701 and this is the number given on all subsequent press releases and so-called "fact sheets." However, based on the review by Hynek and the CUFOS staff of the released sanitized BB microfilm and Hynek's personal records which included many missing BB documents, the final number was determined to have been approximately 587, apparently reflecting an IFO elimination process carried out on old historical cases by the last BB Chief, Major Hector Quintanilla in the 60's (and of dubious scientific validity based on examples McDonald studied), which must have reduced the number of Unexplained cases by 114. Evidently the AF did not update its annual historical UFO statistics to reflect this gradual winnowing process, not realizing it could improve upon its anti-UFO PR position by reducing the perennially embarrassing number of Unidentifieds.

However, in reverse, Hynek re-evaluated 53 Blue Book IFO cases as Unexplained UFO cases, bringing the total partially back, up to 640, unfortunately a complete list identifying these is not available, though some of the worksheets have been copied by Jan Aldrich from CUFOS-Hynek files. A number of the re-evaluated cases have been included in *The Hynek UFO Report* book published in 1977.

Much more disturbing are the indications from my limited review of BB cases that there may be as many as possibly 4,000 Unexplained UFO cases miscategorized as IFO's in the BB files (which total some 13,134 cases altogether, UFO and IFO, according to the Hynek-CUFOS revised statistics), mostly military cases and many involving radar.

This catalog is based primarily on the outstanding catalog prepared by Don Berliner of the Fund for UFO Research (FUFOR) from his exhaustive review of the then unreleased Project Blue Book (BB) files at Maxwell AFB (Air Force Base), Alabama, in Jan. 1974, which included many witness names that were later sanitized out ("blacked out") of the public release of the BB files by the Air Force in 1974-5. Berliner's effort ought to be supplemented with the tremendous intelligence coup by William Weitzel and FUFOR in 1998 in securing copies of the unsanitized 16 mm BB microfilm that the National Archives inadvertently made available, but no resources are available for such a large-scale research project. All of UFOlogy owes an enormous debt of gratitude to FUFOR for this lasting contribution to the preservation and disclosure of this vast treasure of priceless military UFO records.

The Berliner catalog has been heavily augmented here with:

- (a) Listing of BB Unknowns selected from the National Archives index of BB cases (published by Steiger in Nov 1976 and available on the World Wide Web at various websites) but lacking descriptive sighting details
- (b) Partial case listings of re-evaluations by Hynek and CUFOS staff (primarily in *The Hynek UFO Report*, Dell, Dec. 1977), who personally retained many thousands of unsanitized BB case files in his personal papers which are now with CUFOS
- (c) The 1969 Magonia catalog of landing/close encounter cases by Jacques Vallée who as Hynek's assistant in the 60's examined the BB files and Hynek's copies of BB cases, when many reports had not yet "disappeared"

- (d) Battelle Memorial Institute list of 12 Best Unknowns which also caught a few cases before records vanished (May 5, 1955, report issued as Blue Book Special Report No. 14)
- (e) Lists by James McDonald who saw and copied BB files on five research trips from 1966 to 1970 and conducted his own exhaustive and independent investigations, especially see his prepared statement in the 1968 House Committee on Science and Astronautics hearing (McDonald 1968) and his 1969 AAAS paper as revised and published posthumously by Sagan & Page (McDonald 1972)
- (f) Records obtained by Jan Aldrich of Project 1947 directly from unsanitized BB files
- (g) Condon Committee investigations of BB cases published in the Condon Report (Bantam Books edition, New York, Jan. 1969; especially see the convenient "Sightings, Unexplained" listing in the index, p. 961)
- (h) National Aviation Reporting Center on Anomalous Phenomena (NARCAP)
- (i) Willy Smith's case evaluations (*On Pilots and UFOs*, UNICAT 1997)
- (j) NICAP website compiled by Francis Ridge
- (k) Dominique Weinstein's *Aircraft/UFO Encounters* (Nov. 1997; and rev. 5th ed. June 2001, *Aircraft UAP Encounters*)
- (l) Darrach and Ginna, *LIFE* magazine article, April 7, 1952
- (m) Various USAF records obtained by Freedom of Information Act (FOIA) requests, especially a collection of long-missing Project SIGN/GRUDGE records found at the St. Louis records center, however please note that it is uncertain whether all of these cases are in the BB/predecessor files or had ever been and got lost or were removed
- (n) My personal investigations and research (especially all bracketed [] material and most parenthetical () material)

There are other resources that could be consulted and will be eventually (the Loren Gross histories are a noteworthy omission not presently available to this researcher), but this is a first pass at an ongoing, continually revised and supplemented work.

Berliner's and the National Archives' lists represent most of the cases that BB itself categorized as Unknowns when it closed down in 1970. Only after all of the unsanitized records have been examined will it be possible to complete and double check this list. I hope to eventually include all cases that have ever been categorized as Unknowns by BB or its predecessor projects. Later, this full list will then be fully re-screened for IFO's.

At present it is unclear at what stage or stages the various lists of Blue Book Unknowns represent initial, intermediate or final evaluations by Blue Book staff and/or Blue Book consultants such as Hynek and Battelle Memorial Institute (which carried out the 1952-4 statistical study known as BB Special Report 14). A comprehensive examination of the sanitized or unsanitized BB microfilm files and Hynek's enormous BB record collection at CUFOS would be needed to answer this question in most cases but at present there are no resources to undertake such a time-consuming project. Even so, because of lost and incomplete files this may not be possible in all cases even if the available records could be studied. The goal here is completeness of documentation and to try to fill in gaps where records have been lost. Whenever a case has been evaluated as an "Unknown" or "Unidentified" by BB staff and/or competent investigators it is included here, with preference given for those cases that have actually been *investigated* since it appears that many that are on BB's list as Unknowns do not seem to have actually been investigated. Eventually such cases will be weeded out (at the screening stage mentioned above). Cases that were evaluated by the AF as Unknowns at some point but have turned out to be IFO's are excluded here (Fred Johnson and Chiles-Whitted are included here but with IFO notations), and some famous cases may never have been officially considered unexplained by the military or perhaps only briefly (e.g., Arnold).

IMPORTANT: Please note that the AF did *not* simply start by calling all 13,000+ cases "Unknowns" and then whittle them down to 700. Rather, the AF started with 13,000+ cases and after a process of elimination and some investigation came up with only some 700 "Unknowns."

For convenience "BB files" will be considered inclusive of predecessor projects at Wright-Patterson AFB (Wright Field), but not projects or investigations elsewhere, such as Air Force Intelligence. Note that operational dates are not necessarily the dates of the orders unless the orders were implemented immediately or made effective immediately or both (e.g., Project SIGN was ordered by the AF Director of R&D on Dec. 30, 1947, but not initiated until Jan. 22 and not formally operational until Jan. 23, 1948; SIGN's name was ordered changed by the AF Director of R&D on Dec. 16, 1948, but not implemented until the day after SIGN's Final Report was issued on Feb. 11, 1949):

Project SIGN	Jan. 23, 1948	-	Feb. 11, 1949

GRUDGE reactivation	July 1950	-	Oct. 22, 1951

Project BLUE BOOK	March 14, 1952	-	Jan. 30, 1970

Comments such as "No further information in the files" are typically by Berliner. Annotations of "Case missing" are usually from the National Archives index. Uncertainties or discrepancies in reported data such as dates, times, etc., are indicated in brackets [] and/or with question marks [?], and conflicting data from differing sources may be indicated by "cf." in the sources notes. Cases that may seem out of order by time of day are listed approximately chronologically according to times as converted to GMT or UTC, though not perfectly rigorously. The local time is more important for indicating lighting conditions than to robotically convert all times to a universal GMT/UTC which no one can relate to. Some date confusion exists on many nighttime cases due to midnight date crossovers, which will have to be resolved by study of the case files. Geographic locations and coordinates have been spot checked but not completely. State abbreviations (U.S.) are applied partially and only when confusion is avoided. Statute miles are preferred here, however in many cases military records referring to "miles" may refer to nautical miles and it is not possible at present to know for certainty which unit is used.

(FOIA)		multiple	0.05° ?	
19.	50	July 8, 1947. Muroc Army Air Field, Calif. 9:30 a.m. (PDT). AAF 1st Lt. Joseph C. McHenry, T/Sgt Joseph Ruvolo, S/Sgt Gerald E. Nauman, and Miss Jannette Marie Scotte, saw 2 disc-shaped or spherical objects, silver and apparently metallic, fly a wide circular pattern [?] at about 7,000-8,000 ft at 300-400 mph heading 320° (about NW) toward Mojave, Calif. Before the first 2 objects disappeared a 3rd similar disc or spherical silver object reflecting sunlight was seen, with additional 5 witnesses, to the N flying tight circles at about 7,000-8,000 ft beyond capability of known aircraft, maintaining altitude. No sound or trails. (FOIA)	3-4 mins + ?	9		
20.		July 8, 1947. Muroc Army Air Field, Calif. 11:50 a.m.-12 noon. AAF experimental test pilot Capt. John Paul Stapp, Mr. Lenz from Wright Field and 2 others in an observation truck at Area 3 of Rogers Dry Lake for a P-82 ejection seat test saw a round silver or aluminum-white object at first thought to be a parachute, about 25 ft wide, falling from a height below the 20,000 ft of the test aircraft at 3x the rate for an ejection seat test, drifting horizontally toward Mt. Wilson (to the S) at less than 50-80 mph, which when close to horizon appeared to have an oval outline with 2 thick fins or nobs on the upper surface which seemed to rotate or oscillate, no propellers, slowly disappearing below the mountain tops in the distance after 90 secs. Others witnesses independently, including Muroc CO Col. Gilkey and engineer Major Richard R. Shoop and wife saw 5-8 miles away to the N [?] the apparently same falling object, thin metallic aluminum colored and the size of a pursuit aircraft [50 ft?], from a different location, reflecting sunlight and oscillating, descend to ground level, then rise again and move slowly off in the distance for a total of 8 mins. No sound or trail. (FOIA; Vallée Magonia 60)	8 mins	7+	0.1° ?	triangulation ?

23.		July 10, 1947. Harmon Field, Newfoundland, Canada. Between 3 and 5 p.m. [or 5:30 p.m. (ADT)]. 3 ground crewmen, A. R. Leidy, J. N. Mehrman, and J. E. Woodruff, of Pan American Airways, briefly saw a translucent disc or wheel-shaped object fly very fast, leaving a dark blue trail then ascend and cut a path through the clouds. (Berliner)		3		photo
24.		July 10, 1947. Near Ft. Sumner, New Mexico. 4:47 p.m. Dr. Lincoln LaPaz with wife and 2 teenage daughters were driving W on Hwy 60 when they saw a sharply outlined, elliptical white seemingly luminous 200 ft object (major/minor axis ratio 2.45) wobbling in the distance to the W [probably 272° azimuth initially] about 20-30 miles away (distance from weather data) for about 30 secs almost motionless. It disappeared behind a cloud at 273° azimuth elevation 1° but reappeared 5 secs later further to the right, or N, and higher at 275° azimuth 2° elevation, thus a speed of roughly 600-900 mph, but no sound, no trail. Object continued to slowly drift N about 2 mins [in level flight] until disappearing in the cloud bank [at about 287° azimuth]. Sperry made evasive 45° turn to the right (to 275° heading), object passed from 11 o'clock to 7 o'clock position (about 125° or SE) to the left at slightly higher altitude meanwhile crossing in front of upper part of full moon to the S (at 145° or 159° azimuth 22° or 27° elevation, depending on whether EST or EDT time, 97% full) where submarine-like silhouette clearly seen, about 5 miles away. Sperry turned left back onto original course to get the object back in view, object may have stayed stationary about 30 secs at this point. 		<p>radar interference which came from an unidentified aircraft at relative bearing 130° (E) at 28 n.mi. (32 miles) heading away. Anti-jamming device on the APQ-24 radar was turned on at 11:20 p.m. but did not affect the jamming on the radar scope. At 11:35 jamming covered 120° of the right side of the radar scope and then an unidentified aircraft was seen visually on the right side of the B-36, which was then at 18,000 ft at 65°40' N, 71°40' W (over SW Baffin Island). Object had "unconventional running lights" all white instead of red-green, with twin white flashing tail lights, traveling about 30 knots faster than the B-36, crossed the front from right to left heading 334° true towards the NNW, and was in view about 20 mins [to a distance of about 12 miles]. While the object was still visible, at 11:50 p.m. the B-36 autopilot and APQ-24 radar set went out, the latter returning after a few mins about when the object disappeared. ECM operators S/Sgt. Donald E. Jenkins and S/Sgt. Doty T. Larimore on 2 B-36 flights from Goose to Resolute while still over Labrador the next day detected carrier wave signals at several frequencies and some radar-like pulses at other frequencies, all below 1,000 MHz. Another 2 F-86's were scrambled from George AFB at about 8:00 as the first 2 were running low on fuel and were released to return at 8:10-15 when the 2nd flight arrived. The 2nd pair of F-86's was vectored by GCI radar to 33°20' N, 117°30' W (Camp Pendleton), arrived there at 8:10 at 43,000 ft [and circled?], spotted the object at 1 o'clock high back to the N toward Muroc/Edwards AFB appearing at about 50,000-55,000 ft in a controlled orbit right and left, appearing as a swept wing aircraft [that sped up when the F-86's tried to close] and the object was found near March AFB, Riverside, to the NNW but they broke off intercept because of low fuel at about 8:20-25, landing at 8:45. 3rd flight of 2 F-86's scrambled [at about 8:45??] from George AFB [?] saw the object shortly after takeoff seeming to be heading S as F-86's made climbing turns up to 43,500 ft under the round silvery object [at 55,000? ft over the San Bernardino Mtns. ?] until breaking off intercept at about 9:25 a.m. [A 7th F-86 was scrambled to the S toward Long Beach but the UFO was gone.]</p>	1.5+ hrs	7+ ?	0.3° ? 771.		Feb. 15, 1954. Near Savannah River AEC site, South Carolina. 10:15-10:36 p.m. (EST). USAF ADC radar operator S/Sgt. K. A. Payne, 728th AC&W Sq, Dobbins AFB, Greenville, South Carolina, using MPS-7 radar tracked high speed unidentified target the size of about 2 normal aircraft to the S at 203° azimuth at roughly 100 miles range (at about 33.5° N, 83.0° W, near Siloam, Ga.) heading E about 100° true at about 360 knots (400 mph) and 20,000 ft altitude as of 10:18 p.m. (when near Crawfordville). At 10:21 at about 33°28' N, 82° 5' W (near Augusta) the target had reached 22,000 ft and turned slightly right to about a 110° heading straight toward the Savannah River AEC plant and accelerating to operator estimated speed of 900 knots (1,000 mph) average speed (or as recalculated from mapped positions about 750 mph, probable peak speed about 1,500 mph at 2 g's at 10:21:30), then it violated the prohibited AEC airspace at 10:22 at about 33°24' N, 81°53' W. Pope AFB radar also tracked the target violating AEC airspace and notified Payne at Dobbins AFB. At that point at 10:22:30 (?) object had made a left turn to about a 75° heading, slowing to about 600 mph and continued turning to about 55° heading. At 10:23 at about 33°30' N, 81°39' W (near New Ellenton, S.C.), target made a sharp 75° turn to the N at about 340° heading having accelerated again to about 1,200 mph average speed (probable peak speed about 2,400 mph at 3 g's at 10:22:45) heading out of the AEC prohibited zone. Target slowed to about 600 mph again by 10:24 near Aiken when it sharply turned to the E on a heading of about 70° then 50° then 45° while passing to the S of Columbia, then turned N to a heading of about 20° where it faded near Kershaw at 10:36 p.m. (Sparks; Jan Aldrich)	21 mins	2+		multiple radars

		7:15 p.m., KC-97 pilots Capt. G. E. Brown, 1st Lt. L. B. Gordon and 1st Lt. J. P. Glover, 301st Air Refueling Sq, 301st Bomb Wing, while flying KC-97 to practice landing on 180° heading at 1,500 ft about 5-8 miles SW of Nouasseur base saw 2 white lights to the right at about the same altitude, with one light slightly lower than the other, appearing to be 2 aircraft in formation on collision course or "making a pass" forcing an evasive turn away by the KC-97. Later [at 8:20? 9:20?], after landing and takeoff they saw the same or similar 2 white lights on the same course from the S at 180° on a collision course and they made an evasive 360° turn. At 7:38 p.m. another KC-97 flown by pilots Capt. Robert R. Zadnick, Lt. Paul R. Fisher and Lt. George A. Kerr, also 301st ARS, 301st BW, on GCA landing at 180° heading at 1,500 ft about 5 miles SW of Nouasseur base at about the same altitude and to the left of course appearing to be headed W on a cross path or collision course, as it crossed it was seen to be 2 lights as if 2 jets in formation, no aircraft running lights. One light passed over and one under the KC-97. At 9:55 p.m., C-54 from Lagos, Nigeria, based at Kelly AFB, Texas, senior pilot Capt. William M. Pond, copilot Lt. I. W. Gilchrist and navigator Capt. James F. Pullen while flying at 2,000 ft on 170° heading on GCA landing at Nouasseur base saw white or amber light like an aircraft landing light at about the same altitude approaching on a collision course heading W 2-3 miles away, then turned onto a direct headon course, passing within 2 miles, then suddenly disappeared like turning off a light for 10-15 secs, then reappeared hovering, descended to ground then rose, and disappeared behind the C-54 after completing its turn onto final landing approach. He tried to pursue the flame, turning off to the right on a rough gravel road to the SW, lost sight of flame while trying to get car up steep rough hill. At the top after 10-15 secs of continuing along gravel road he suddenly noticed a shiny whitish-aluminum color landed object about 12-15 ft tall about 800 ft away to the SW down in a gully, at first looking like upturned car but actually appearing oval long-axis vertical on two legs, and for about these 2 secs also saw 2 small-adult-like figures in white coveralls near object, one turning toward him seemingly startled and jumping. He lost sight of object as he drove about 1,000 ft further WSW, radioed headquarters he was investigating possible car accident, then stopped at the top of the ridge about 103 ft from landing site down in the gully to the SE. He got out, heard 2-3 loud thumping noises like a door shut hard, walked in front of the car to possibly 75 ft distance when he heard a very loud roar increasing in volume and saw a smokeless blue-orange flame coming from beneath the oval object, now seeming long-axis horizontal at this angle (about 120° from previous sighting), with a red insignia or lettering in the middle about 2 x 2-1/2 ft, and slowly rising. He thought it was going to explode and ran away, putting car between him and the object, about 25 ft and 6 secs of running from the car he glanced back and saw object had risen about 20-25 ft to level of his car, ran another 25 ft and "ducked down" below edge of ridge. Roaring noise stopped, he looked up and saw object heading to the SW (towards W end of Socorro Municipal Airport 1 mile away) at level height just clearing 8 ft dynamite shack by about 3 ft moving "very fast," no flame or smoke or noise. He ran back to patrol car, radioed headquarters, saw object climbing slowly and "get small" in the distance just clearing Box Canyon or Sixmile Canyon Mtn. (about 6 miles to WSW). Lights blinked out and object reappeared instantly across the swamp 1,500 ft away. The whole object lit up with a yellowish glow at one point and also rose up 500 ft then descended again. After 2-3 mins of viewing, when 2 flashlights appeared in the distance the object seemed to respond by flying away at high speed directly over the witnesses with a whistling sound like a rifle bullet ricocheting. Object split into 4 similar red oval objects vertically a number of times, each separated by about 2,000 ft and each emitting a "red ray," then retracting the lowest objects up into the top object. Albuquerque radar tracked the object 39 miles ahead of the Lear jet moving on the same heading, with no transponder signal and at that moment the object blinked off visually for 30 secs then blinked on. Albuquerque control contacted a National Airlines DC-8 over Casa Grande, Ariz., whose pilot confirmed the Lear pilot's reports. Albuquerque control warned the Lear that the object suddenly darted towards the Lear at high speed within secs until the radar blips merged [possibly 39 miles in 10 secs or roughly 14,000 mph]. Object flooded the Lear with intense red light so bright the pilot had difficulty seeing his instrument panel, and it maintained position in front of the Lear for a few mins then, then blinked out then came on again and started falling back behind the left wing, then pulled forward again. (When the object blinked off radar at Albuquerque control would lose the object then regain it when it blinked on again (?).) Both UFO and Lear jet made left turns over Winslow, Ariz., then Los Angeles Center radar picked up both targets. Past Flagstaff the object climbed at a 30° angle disappearing to the W in <10 secs.
